AMAN KUMAR

Java Full Stack Developer | Spring Boot | REST API | Fresher | Immediate Joiner

9155412326 | amankkr38@gmail.com | Bengaluru, Karnataka | linkedin.com/in/amankumar1001 | github.com/amanmathur101

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer (Fresher) with hands-on experience building and deploying 2 production-grade applications using Java 8, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and PostgreSQL. Demonstrated ability to design secure RESTful APIs with JWT-based authentication and Role-Based Access Control (RBAC) via Spring Security — skills validated by achieving Runner-Up at Smart India Hackathon 2024 (National Finals) among top engineering teams nationwide. Completed professional Java Full Stack training at JSPIDER (Bengaluru) with exposure to Agile/Scrum, Docker, and full SDLC from design to cloud deployment (Render + Vercel). Solved 150+ DSA problems on LeetCode & GeeksforGeeks. Immediate joiner, open to relocation across PAN India.

TECHNICAL SKILLS

Languages	Java 8, Core Java, JavaScript (ES6+), SQL, Python (Basics)
Backend	Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, RESTful API Design, JWT Authentication, JDBC, RBAC, Microservices (concepts)
Frontend	ReactJS, HTML5, CSS3, Tailwind CSS
Databases	PostgreSQL, MySQL
Tools & DevOps	Git, GitHub, Maven, Docker, Postman, IntelliJ IDEA, Eclipse, Render, Vercel
Concepts	OOP, DSA, Multithreading, Exception Handling, MVC Architecture, Agile/Scrum, SDLC, Design Patterns

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Trainee
Jul 2024 – Feb 2025

JSPIDER — Professional Training Institute | Bengaluru, Karnataka

- Developed and deployed RESTful APIs using Spring Boot, Spring MVC, and Hibernate following industry-standard SDLC practices from requirements gathering to production release.
- Improved PostgreSQL query performance by 15% through strategic indexing and execution plan optimization; executed full CRUD operations aligned with database best practices.
- Built responsive frontend UI components with ReactJS, HTML5, CSS3, and Tailwind CSS, applying MVC architecture and OOP principles throughout.
- Participated actively in Agile/Scrum sprint planning, daily standups, and code reviews; managed source control using Git/GitHub across team workflows.
- Delivered technical documentation and participated in knowledge-sharing sessions; mentored peers on backend best practices and REST API design.

Python Programming Intern (Online)
Nov 2024 – Dec 2024

National Institute of Electronics & IT (NIELIT) | Remote

- Completed 8-week intensive Python internship organized by NIELIT, Gorakhpur, gaining hands-on experience in scripting, data handling, and backend programming fundamentals.
- Applied Python concepts in structured exercises and mini-projects under professional mentorship, strengthening programming fundamentals.

PROJECTS

Job Portal Platform (Production-Grade Full Stack Application)

Tech Stack: *Java 8 | Spring Boot | Spring Security | JWT | Spring Data JPA | Hibernate | PostgreSQL | ReactJS | Docker | Render | Vercel*

- **Built a scalable, production-ready job portal eliminating manual hiring friction — supports 100+ user registrations and live job listings.**

Problem Solved:

- Implemented JWT-based authentication and RBAC (USER / RECRUITER roles) using Spring Security, ensuring secure, isolated data access between user types.
- Designed and integrated 10+ RESTful APIs covering user management, job posting, resume upload, and application tracking — fully documented with Postman.
- Optimized PostgreSQL queries via indexing and execution plan tuning, reducing average API response time by 25%.
- Containerized application with Docker; deployed backend on Render and frontend on Vercel — demonstrating end-to-end full SDLC and DevOps ownership.

GitHub: github.com/amanmathur101/JobPortalBackend

Banking Management System (Secure Transactional Application)

Tech Stack: *Java 8 | Spring Boot | Spring Security | JWT | Spring Data JPA | PostgreSQL | ReactJS | Render | Vercel*

- **Engineered a secure, transactional banking application supporting account creation, deposits, withdrawals, and fund transfers with real-time validation.**

Problem Solved:

- Ensured atomic consistency using Spring @Transactional; designed a normalized relational schema to guarantee data integrity across operations.
- Implemented RBAC and JWT authentication with Spring Security; exposed and documented RESTful APIs for account and transaction management via Postman.
- Managed complete SDLC from schema design to cloud deployment (Render backend + Vercel frontend) with PostgreSQL integration.

EDUCATION

Bachelor of Technology — Electronics & Communication Engineering *Oct 2021 – May 2025*

Saharsa College of Engineering, Bihar (Affiliated to Bihar Engineering University) | Bihar

- Academic Standing: Top 10% of graduating class; consistently among top performers in technical coursework.
- Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, OOP with Java, Software Engineering.
- Key Achievement: Runner-Up at Smart India Hackathon 2024 — National Finals, representing college among top engineering teams pan-India.

ACHIEVEMENTS & CERTIFICATIONS

- Runner-Up — Smart India Hackathon 2024 (National Finals): Built an innovative full-stack tech solution; competed among top engineering teams across India.
- Top 10% Academic Rank: Excelled in college-level coding contests and technical competitions.
- Problem-Solving: Solved 150+ DSA problems on LeetCode & GeeksforGeeks — arrays, strings, trees, graphs, dynamic programming.
- Certification — Computer Networks and Internet Protocols (Jan 2024 – Apr 2024): TCP/IP, OSI model, internet protocols.
- JEE Mains Qualifier: All India Rank 5045 — demonstrating strong analytical and quantitative aptitude.
